Utopia's UNI/SIDE metal side-wall construction (pat. pend.) eliminates the many vertical seams required in ordinary construction where sections of metal are overlapped. The two continuous UNI/SIDE panels are joined in a weather tight seal with Utopia's new SNAP-LOCK molding (pat. pend.) of vinyl plastic. This unique system offers a finer seamless appearance and guarantees a completely weatherproof installation.

"Side-Aisle" manufacturing provides the best features of assembly-line construction techniques while still maintaining a high level of craftsmanship normally found only in custom production. This results in highest quality at lowest cost.
